

Controlpad Programmable Keypads

Customizing Your Own Keypad To Fit Your Specific Needs Couldn't Be Easier!

Model 682 w/custom printed keys

Example of how the keypad can look with custom printed keycaps.

Relegendable key

Model 683

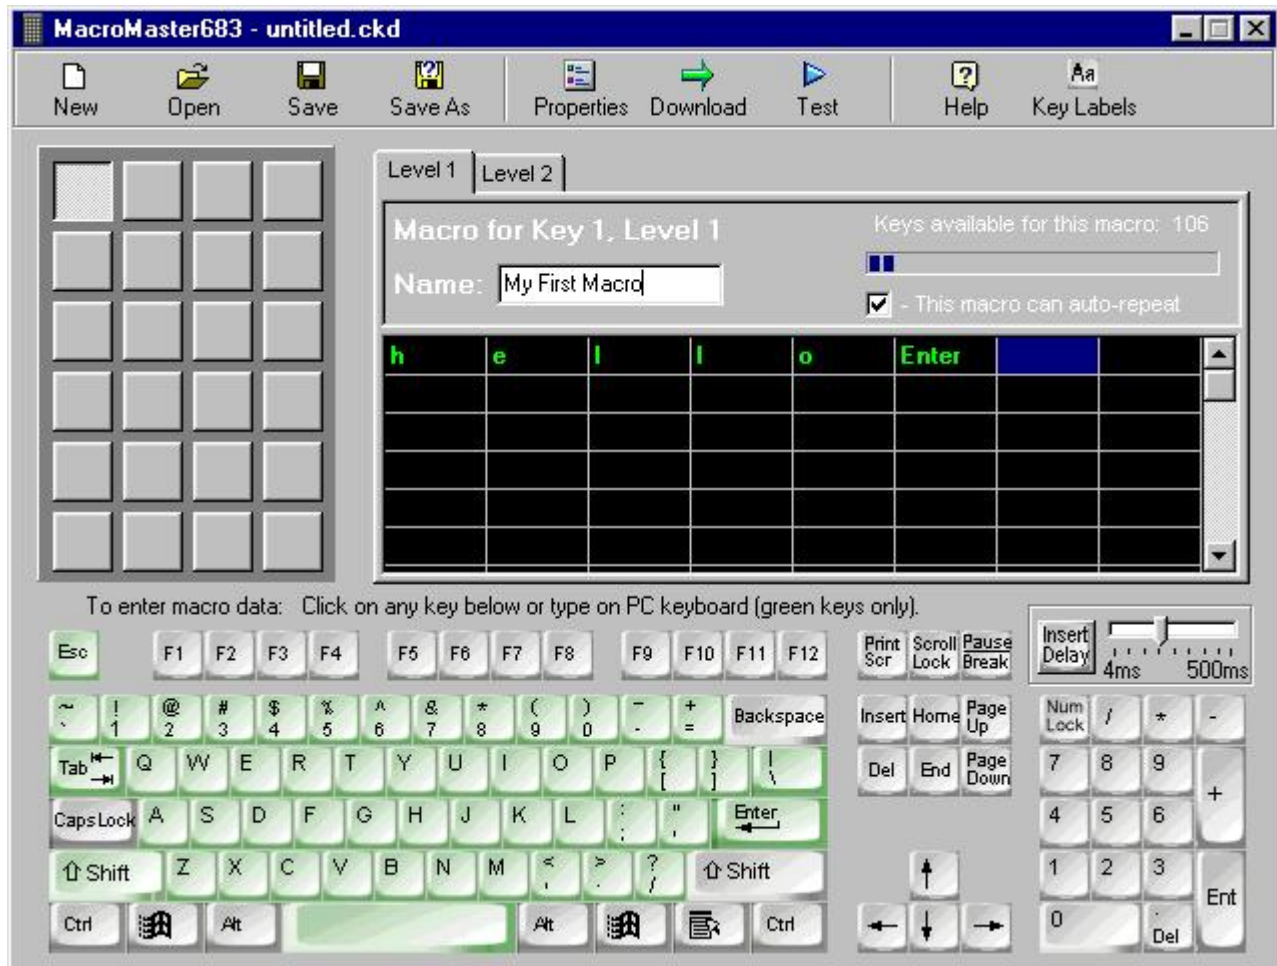

- Easy to Program
- Can share PS2 port with keyboard or mouse.
- 24-key and 35-key keypads available.
- Flexible layout with optional, larger key-caps.
- Easy to configure, test, and implement.
- You can print your own legends and insert them under the lense of the keycap.
- Optionally, you can order custom printed keycaps for a finished look (additional cost).

** Note: a minimum of 50 keypads is required to order custom printed keycaps. Otherwise no minimum. Call for pricing.*

The MacroMaster 683 Application looks like this.

- Step # 2 -** Use your mouse to click on the key you want to program. The 683 buttons are located on the top/left corner of the MacroMaster program.
- Step # 3 -** Enter the keyboard keystrokes that you want to record into the selected macro location.
